

[fw-wiz] 802.11b and IPSec

I'm looking at putting in wireless access at home, but I'd really rather do IPSec than WEP (LEAP or not)– are there any commercial WAPs that will gateway IPSec traffic, or am I stuck building my own gateway with a spare PC, *nix and a PCI wireless adapter, or doing pass through to a gateway host?

If you reply to me directly, I'll summarize for the list.

Thanks,

Paul
