I knew that phrase would cause problems, but since he directly met the criteria of the original query, I let the message through- I'm going to *not* let the "airgap" argument flare up (unless Mr. Steinberg *wants* to take on all-comers, in which case he's entitled to the deathmatch that ensues, I *know* there's a line, and I'll be standing in it.)

Some folks just can't deal with Open Source- they can get a commercial Linux thing, or they can call Postfix the "IBM Secure Internet Mailer," which is my "FTP takes too many ports" for mail systems ;)
