-----BEGIN PGP SIGNED MESSAGE-----

Hash: SHA1

A new list for the discussion of SSL-TLS issues and technology has been created. The purpose of the list is to provide you with a moderated SSL, TLS and security related list that is more like a journal than a public soapbox. SSL-LIST will not be cluttered with spam, flames or other non-list related traffic. The addresses of the list members will not be made available for any purpose other than maintaining the list. This is because we feel your participation on this list is your decision and should not be an invitation to unnecessary junk mail.

This list is hosted by ICSA Labs, an independent division of TruSecure Corporation.

To keep list volume low and signal to noise ratio high, this list will be moderated, approving and publishing postings on an approximately daily or more frequent basis.

Commercial postings will be discouraged unless they are of high technical content. I.e.: it is OK to post a description of a product or how a product could help solve a problem. It is NOT OK to follow up to postings saying "buy our thing! it does that!"

The following vendors are currently subscribed to SSL-LIST:

ArrayNetworks
Aspelle
AT&T
Aventail Corporation
Cisco Systems
Intoto
Motivus Software
Neoteris

Firewall-Wizards: [fw-wiz] New List – SSL-TLS Public Discussion

NETGEAR
Netilla Networks
NetScaler
NetScreen Technologies
Nortel Networks
Novell Networks
Rainbow Technologies
SafeWeb
Secure Computing
Stonesoft
uRoam Corporation
Watchguard
Whale Communications
Zyxel

More information, and a form to submit a subscription request, can be found at:
