Hi,

You're right. I wasn't specific. I want a tool to draw simbols, pictures of routers, servers, desktops like the ones in the Firewall FAQ and make the network topology with the wires. It's not a network scanner to map. Thanks to everybody that tried to answer my previous blind question.

vmm.

>Hi there, I am not quite sure what you mean to be honest. Are you asking for a s/w

program that will actively map your network for you? Or more a s/w program like

Microsoft's Visio which will let you choose various symbols to represent various thin

>s

such as routers et al? Could you please clarify?

Cheers!
