for a syslog daemon kiwi is pretty good for filtering traffic. For running reports you can try cacti or mrtg.

On 4/5/07, Eric Anderson <[strasser@xxxxxxxxxxxxxxxxxxxxxx](mailto:strasser@xxxxxxxxxxxxxxxxxxxxxx)> wrote:

Hello everyone,  
I'm interested in what other admins are using for a reporting server for syslog analysis. I've an Open SUSE 10.2 syslog server receiving packets from a PIX 515E and I want to run reports on IP traffic.

Can anyone recommend anything?

Eric
