Hello,

what is the right way to disable XFree86 and wdm listening ports tcp 6000 and tcp 1024.

I read in man XFree86 about the `–nolisten tcp` option and tried to set in `/usr/X11R6/lib/X11/xdm`

```
:0 local /usr/X11R6/bin/X –nolisten tcp
```

but it was not successful.

What is the right way to close the ports without use of IPFW?

Your help would be appreciated.

Thank´s  
Wolfgang
