Hi!

Thanks for developing such interesting feature :) !

But I have some problems, which I cant understand.

```
# sysctl security.mac.chkexec.enforce=0
security.mac.chkexec.enforce: 1 -> 0
```

```
# setfhash /usr/local/sbin/logrotate
# getfhash /usr/local/sbin/logrotate
/usr/local/sbin/logrotate: sha1 78513a038cd9416f2be710b6732369b96874b364
```

```
# sysctl security.mac.chkexec.enforce=1
security.mac.chkexec.enforce: 0 -> 1
```

```
# /usr/local/sbin/logrotate
bash: /usr/local/sbin/logrotate: Operation not permitted
```

```
# getfhash /usr/local/sbin/logrotate
/usr/local/sbin/logrotate: sha1 78513a038cd9416f2be710b6732369b96874b364
```

How can I see what exactly goes wrong ???

Oleg.
