Hello!

Thanks, that's great, however portaudit's vulnerabilities database still lists the port as vulnerable:

<http://www.FreeBSD.org/ports/portaudit/24f6b1eb-43d5-11db-81e1-000e0c2e438a.html>

Affects:

* win32-codecs >0

I wonder whether it's possible to list the port there conditionally (e.g. only if QUICKTIME option is 'off').
