G0BBL3S UNM4SK3D

A cross-site tracing error that is revealed through EtherLeak has been discovered regarding the information released by g0bb13s!% !#%^

While investigating the source of our backdoored mp3 files, we have found that gobbles is not only not a reader of the securityfocus, but it is, contrary to popular belief, a whitehat group.

We have also found that Gobbles is Theo. It is believed that is how gobbles hacked OpenBSD, since they are one in the same. Duh.

Shoutouts go to Ofir Arkin, Theo, our boys in Em City, the RIAA, and Jack Valenti's pool boy. We bet he ain't feelin a thing anymore.
