Dear Steve,

Dear List,

> *Its a mail client issue; doesn't happen if you click on
> a link from Internet Explorer.*

No, I am very sure that this happens also, if you follow the link inside a web page only (without an involving mail client).

So go to <http://www.counterpane.com/crypto-gram.html>, scroll down and click the link that says "Holger Hasselbach has translated several issues of Crypto-Gram into German [...]". The error occurs as described in my original posting.

> *Your mail headers don't exactly give away your own mail client.
> What would it be?*

Microsoft Outlook 2002 SP2 on Windows XP Professional

Yours,

Marc Ruef
