Debian Security Advisory DSA 797-2 security@debian.org

<http://www.debian.org/security/> Michael Stone

September 28th, 2005 <http://www.debian.org/security/faq>

Package : zsync

Vulnerability : DOS

Problem-Type : buffer overflow

Debian-specific: no

CVE ID : CAN-2005-1849, CAN-2005-2096

zsync, a file transfer program, includes a modified local copy of the zlib library, and is vulnerable to certain bugs fixed previously in the zlib package.

There was a build error for the sarge i386 proftpd packages released in DSA 797-1. A new build, zsync_0.3.3-1.sarge.1.2, has been prepared to correct this error. The packages for other architectures are unaffected.

Upgrade Instructions

wget url

 will fetch the file for you

dpkg -i file.deb

 will install the referenced file.

If you are using the apt-get package manager, use the line for sources.list as given below:

Full-Disclosure: [Full-disclosure] [SECURITY] [DSA 797-2] Updated zsync i386 packages fix build error

```
apt-get update
  will update the internal database
apt-get upgrade
  will install corrected packages
```

You may use an automated update by adding the resources from the footer to the proper configuration.

Debian GNU/Linux 3.1 alias sarge

Intel IA-32 architecture:

http://security.debian.org/pool/updates/main/z/zsync/zsync_0.3.3-1.sarge.1.2_i386.deb
Size/MD5 checksum: 94516 bb4ff605c6e3b94f23dd0986ca55e450

These files will probably be moved into the stable distribution on its next update.

For apt-get: deb <http://security.debian.org/stable/updates/main>
For dpkg-ftp: <ftp://security.debian.org/debian-security/dists/stable/updates/main>
