-----BEGIN PGP SIGNED MESSAGE-----

Hash: SHA1

Antifreedom fighters have shut down one of the mirrors. Here be the sauce.

We are requesting mirrors and fellow righteous superheros to promptly archive the files (including Petko D. Petkov, pdp's mailbox RAR volumes), exercising your rights of freedom of speech and awesomeness. We also request str0ke, that little guy with mustache at milw0rm.com, to archive this piece of Internet and security industry history.

It's about time to start the greatest showdown of jews.

Thanks to Pink the Whiz Kid, Bulletman, Crimson Avenger and the rest of the crew at SoJ.

Excerpt of Tom Ferris' Internet Justice magazine article:

```

Subject: Re: SendGate: Sendmail Multiple Vulnerabilities (Race Condition
DoS, Memory Jumps, Integer Overflow)=20

Sendmail is, as we know, the most used daemon for SMTP in the world.=20
This is an International Infrastructure vulnerability and should have=20
been treated that way. It wasn't. It was handled not only poorly, but=20
irresponsibly.

You would probably expect me to be the last person to say that Sendmail
is perfectly within their rights. I have had a lot of problems with
what they are doing.

But what did you pay for Sendmail? Was it a dollar, or was it more?
Let me guess. It was much less than a dollar. I bet you paid nothing.

So does anyone owe you anything, let alone a particular process which
you demand with such length?

Now, the same holds true with OpenSSH. I'll tell you what. If there is
ever a security problem (again :) in OpenSSH we will disclose it exactly
like we want, and in no other way, and quite frankly since noone has
ever paid a cent for it's development they have nothing they can say
about it.

Dear non-paying user -- please remember your place.

Or run something else.

[Full-disclosure] Squadron of Justice to the rescue

OK?

Luckily within a few months you will be able to tell Sendmail how to disclose their bugs because their next version is going to come out with a much more commercial licence. Then you can pay for it, and then you can complain too.

w007! w007! w007! w007! w007! w007! G4D1 VS. TH30!!?????

Let me think on it...

On 28/06/07, pdp (architect) <pdp.gnucitizen@xxxxxxxxxxxxxxxxxx> wrote:

I am in winterflood ... do you like the idea of microblogging...

I was thinking that we could have to types of blogs on gnu citizen... the standard one.. which is what we have atm and a micro blog which is actually another category called microblog which contains messages and interesting info but in very all in all very short format.

what do u think... cuz guys, I don't know how they do it but guys like 0x000000 have more traffic ranking according to alexa then us and rsnake is the king of the hill.... we need to truly combine forces and get them out from the top place... but we need to layout an attack... startey...

any ideas?

On 6/28/07, David Kierznowski <david.kierznowski@xxxxxxxx> wrote:

Lets catch up tomorrow so we can plan the move and format and I have a couple of other ideas around the project that I can fill you in on.

Hows L2012?

David

On 28/06/07, pdp (architect) <pdp.gnu citizen@xxxxxxxxxxxxxxxx> wrote:

what's up
we need to start thinking how we are going to move
blogsecurity to
gnu citizen. Do you mind if we follow the same theme... that
will be
the easiest way to do it. I have some cool ideas about how to
graph
the wp-scanner results via Flex.

hei, man
here is something that I wrote yesterday night. Can you have a look
through it and tell me what you think. I will put it on my blog but I
have some reservations so I need advice from true friend. If it is
lame, just tell me. :) Thanks man. Check the attachment.

well, :) too late... it is up now. The modified version is on
<http://www.gnucitizen.org>.

I am also working on some other cool stuff that you may find extremely interesting.

On 9/4/06, pagvac <unknown.pentester@xxxxxxxx> wrote:

i like it, but a bit too heavy for my taste. it feels too long. my mind was only able to read about 60% of it. of course, this is just my opinion, so you shouldn't take it as the absolute truth ;-)

if it took u testing X number of tools until u made it work u could have just said that in one line and then go straight to examples using the tool that finally worked. people like practical and quick things (again this is my opinion).

other than that, interesting topic (backdooring a flash file).

Web browser flaws are nothing new, but the professional crooks are finding new ways to combine these flaws into a system for turning a quick profit. This post describes an example of how one web site is combining system fingerprinting, browser vulnerabilities, email spam, fake web forums, and buggy PHP applications into an automated malware installation system.

good start !!!!

Nabil,

I will look for LC5 latter but I don't know if I will be able to find it or even send it. The best thing to do is to get it fextra privileges but this is not the point.

The purpose of my little experiment is to make python a bit more modular so I can run my scripts on every machine that has Java installed (no Java Mobile unfortunately). I am also using the shell to code python on the fly which is sometimes very handy.

Now, some people may ask why a tool like this is posted on security mail lists. Well, I guess you don't know python. IMHO python can come very handy if you know it. It saved the day many times in my professional career.

If you have any problems with the applet bash me an email. I am kind of constantly improving it. I am also building a small collection of security related scripts that will come as a module which you guys can execute whenever you need.

thanks.

P.S. btw, this is the URL <<http://www.gnucitizen.org/projects/jython-shell/>>

o.Oo.O 9. GADI EVRON TH3 0B3Z3 FUCKT4RD

This is your life and it's ending one minute at a time, Fuck off with your CISSP and shiny DEFCON badges, I say never be complete, I say stop being perfect, I say let... lets evolve, let the Oday fall where they may. Gadi does it everyday, he talks to himself... he sees himself as he'd like to be, he doesn't have the courage you have, to just run with it...

Man, I see in fight club the strongest and smartest men who've ever lived. I see all this potential, and I see squandering. God damn it, an entire generation selling out, eating the corporate bullshit; slaves with white collars. The security industry has us chasing fame, working jobs we hate so we can buy shit we don't need. We're the middle children of history, man. No purpose or place. We have no Great War. No Great Depression. Our Great War's a spiritual war... our Great Depression is our lives. We've all been raised on BUGTRAQ to believe that one day we'd all be millionaires, and Oday gods, and security rock stars.

But we won't. And we're slowly learning that fact.

...AND WE'RE VERY, VERY PISSED OFF.
