Microsoft has just released a web page about SQLSlammer, and also a new version of MS02−061. Thanks to Hjorleifur Kristinsson for the heads up.

http://www.microsoft.com/technet/security/virus/alerts/slammer.asp

The new version of MS02−061 includes an installer, plus the patch I referred to early that deals with the handle leak (Q3177848) all in the one package.

You have to get the download via;

http://www.microsoft.com/technet/security/bulletin/MS02−061.asp

as there is no link to it from the MS Slammer page.

Cheers,
Russ − NTBugtraq Editor
