Folks,

I would like to request your participation in a survey we (Cybertrust) are conducting about the exploit which attacked the MS05-039 Plug-n-Play vulnerability recently. It is anonymous, although you can provide an email address and receive a summary of the results (in about 10 days) if you choose.

Whether you were impacted by this recent worm or not, I'd really appreciate you taking a few minutes to respond. If you had no impact, there's only 7 questions total. If you there was an impact to you, its 21 questions. Either way, shouldn't take long to complete.

The survey will be up until Friday this week.
