PGP Keyserver's Inadequate Permissions

SUMMARY

PGP Keyserver, distributed by Network Associates, suffers from a vulnerability that allows attackers to access administrative web interface without authentication.

DETAILS

Vulnerable systems:

PGP Keyserver 7.0 for Windows NT

PGP Keyserver, distributed by Network Associates, is configured using administrative web interface. It is necessary to authenticate username and password in order to access the administrative web interface.

However, PGP Keyserver has a vulnerability that allows unauthorized users to change settings. Normally, changes of configuration via authentication occur in the following URL:

http://server.name/keyserver/cgi-bin/console.exe?page_size=...

<http://server.name/keyserver/cgi-bin/cs.exe?action=...>

Securiteam: [NT] PGP Keyserver's Inadequate Permissions

PGP Keyserver allows attackers to perform administrative tasks without authentication by using the following URL:

http://server.name/cgi-bin/console.exe?page_size=...

<http://server.name/cgi-bin/cs.exe?action=...>

Solution:

A solution for this security issue in PGP Keyserver 7.0 is available at:

<<http://www.pgp.com/support/product-advisories/keyserver.asp>>

<http://www.pgp.com/support/product-advisories/keyserver.asp>
