When was the last time you checked your server's security?

How about a monthly report?

<http://www.AutomatedScanning.com> -- Know that you're safe.

WebSEAL Vulnerable to a DoS Attack (%2E)

SUMMARY

A security vulnerability in WebSEAL allows remote attackers to cause the product to crash by appending an HTML encoded character '!' (%2E) to the requested URL.

DETAILS

Vulnerable systems:

WebSEAL box version 3.8

Appending a %2e to the URL, causes the WebSEAL application to die.

ADDITIONAL INFORMATION

The information has been provided by
