The following security advisory is sent to the securiteam mailing list, and can be found at the SecuriTeam web site: <http://www.securiteam.com>

-- promotion

When was the last time you checked your server's security?

How about a monthly report?

<http://www.AutomatedScanning.com> -- Know that you're safe.

Pi3Web Webserver Buffer Overflow Vulnerability

SUMMARY

The <<http://pi3web.sourceforge.net>> Pi3 Component architecture is a high performance server based suite of libraries to enable rapid development of server software. One of the components available for this architecture is <<http://pi3web.sourceforge.net/pi3web/>> Pi3Web.

A buffer overflow vulnerability in the product allows remote attackers to crash the server by issuing a malformed request.

DETAILS

Vulnerable systems:

Pi3Web version 2.0

Server crashes after sending very long CGI parameter a few times.

<http://host/cgi-bin/hello.exe..... char>.....>

The instruction at "0x77fcc1df" referenced memory at "0x009946c0". The memory could not be "read".

ADDITIONAL INFORMATION
