When was the last time you checked your server's security?

How about a monthly report?

<http://www.AutomatedScanning.com> -- Know that you're safe.

NGSSniff, RAW_SOCKET Packet Sniffer

DETAILS

NGSSoftware has written a free network packet capture tool (network sniffer) called NGSSniff that runs on Windows XP or 2000. NGSSniff takes advantage of the RAW_SOCKETs capabilities built into those operating systems so does not require any drivers to be installed. One of the advantages of NGSSniff is that it allows analysis of captured packets without having to stop the capture process unlike many other Windows based network sniffers.

ADDITIONAL INFORMATION

The tool can be downloaded from:

<<http://nextgenss.com/products/ngssniff.html>>

<http://nextgenss.com/products/ngssniff.html>

The information has been provided by <<mailto:nisr@nextgenss.com>> David Litchfield.
