Citrix NFuse Information Leak

---

## SUMMARY

Citrix NFuse is an application portal that provides organizations with the ability to integrate and publish interactive applications into any standard web browser. NFuse is a three-tier solution that includes a Citrix Server component, a Web Server component, and a Citrix ICA client component with a web browser. A security vulnerability in the product allows attackers to find out what applications are currently installed under the Citrix server, this gaining a possibility sensitive information.

## DETAILS

Vulnerable systems:

Citrix NFuse version 1.6

If you go to an NFuse servers 'applist.asp' page without first authenticating it reveals a list of all the applications that are configured as published applications.

## ADDITIONAL INFORMATION

The information has been provided by <<mailto:Tom.Lyne@kamino.com>> Tom Lyne.
