The following security advisory is sent to the securiteam mailing list, and can be found at the SecuriTeam web site: <http://www.securiteam.com>

-- promotion

When was the last time you checked your server's security?

How about a monthly report?

<http://www.AutomatedScanning.com> – Know that you're safe.

-----

RRDTOol Path Disclosure Vulnerability (MRTG)

---

## SUMMARY

If you know MRTG, you can think of

<<http://people.ee.ethz.ch/~oetiker/webtools/rrdtool/>> RRDtool as a reimplementaion of MRTG's graphing and logging features. A security vulnerability in the product allows remote attackers to discover the true path used by the server to store files.

## DETAILS

Vulnerable systems:

Mrtg/RRD 14all.cgi version 1.1p15

If an attacker submits a web request containing unexpected arguments for script variables, an error message will be displayed containing the path to the webroot directory of the server running the RRDTOol CGI script.

Example:

<http://host/mrtg.cgi?cfg=blabla>

## ADDITIONAL INFORMATION

Securiteam: [UNIX] RRDTOol Path Disclosure Vulnerability (MRTG)

The information has been provided by <mailto:[ts@securityoffice.net](mailto:ts@securityoffice.net)> Tamer Sahin.
