IcrediBB Contains a Cross Site Scripting Vulnerability

SUMMARY

<<http://www.icredibb.com>> IcrediBB is a web-based bulletin board that is PHP powered, with a MySQL backend. Quick as well as easy on the server's resources. A Cross Site Scripting has been found due to insufficient checking of user input in both thread title and body. Therefore, a user may post a message containing hostile JavaScript causing its execution upon reading of messages, or while viewing a list of new messages.

DETAILS

Vulnerable systems:

IcrediBB version 1.1

Vendor status:

Vendor has been notified of all issues discussed.

Exploit:

Posting a message containing:

```
<script>alert('Cross Site Scripting possible');</script>
```

In either the subject line or the message's body will cause a user (while viewing either the title or the body) to execute the JavaScript.

Securiteam: [UNIX] IcrediBB Contains a Cross Site Scripting Vulnerability

ADDITIONAL INFORMATION

The information has been provided by <mailto:exce@netwinder.nu> Daniel Nyström.
