The following security advisory is sent to the securiteam mailing list, and can be found at the SecuriTeam web site: <http://www.securiteam.com>

-- promotion

When was the last time you checked your server's security?

How about a monthly report?

<http://www.AutomatedScanning.com> -- Know that you're safe.

RealityScape MyLogin 2000 Professional SQL Injection

SUMMARY

<<http://www.hotscripts.com/Detailed/6819.html>> MyLogin 2000 is a server side DLL component that allows you to authenticate and maintain users for your site. The product has been found to contain a security vulnerability that would allow a remote attacker to bypass its username and password protection.

DETAILS

Vulnerable systems:

RealityScape MyLogin 2000 version 1.0.0

Vendor response:

The product has been discontinued.

Solution:

Consider using other products instead of this one.

Exploit:

Input the following values into your logon screen:

Username: ' OR '='

Securiteam: [NT] RealityScape MyLogin 2000 Professional SQL Injection

Password: ' OR '='

You should be able to now enter as the first username record in the database.

ADDITIONAL INFORMATION

The information has been provided by <mailto:derek@sybodek.com> Derek Hinch.
