DNSHijacker, Semi-Automated DNS Hijacking Tool

---

## DETAILS

DNSHijacker is a LibNET/LibPCap based packet sniffer & DNS spoofer. As a versatile tool, DNSHijacker supports tcpdump style filters that allow you to specifically target victims. DNS answers are forged based on entries in a "fabrication table" or by simply forging one answer to all requests. A print only mode is also supported, allowing one to simply monitor DNS traffic.

## ADDITIONAL INFORMATION

The tool can be downloaded from:

<<http://pedram.redhive.com/download.php?file=dnshijacker>>

<http://pedram.redhive.com/download.php?file=dnshijacker>

The information has been provided by <<mailto:pedram@redhive.com>> pedram amini.
