The following security advisory is sent to the securiteam mailing list, and can be found at the SecuriTeam web site: <http://www.securiteam.com>

-- promotion

When was the last time you checked your server's security?

How about a monthly report?

<http://www.AutomatedScanning.com> -- Know that you're safe.

boegADT, Automated Exploit Code Generation

DETAILS

<<http://qb0x.net/tools/boegADT/>> boegADT is a UNIX based library for make easy to write buffer overflow exploits. The intention of this library is to make possible that anyone can write an exploit without knowledge of the techniques.

boegADT uses the GNU debugger and Perl. The purpose of a debugger is to allow the library to see what is going inside the binary you want to exploit.

ADDITIONAL INFORMATION

The tool can be downloaded from:

<<http://qb0x.net/tools/boegADT/>> <http://qb0x.net/tools/boegADT/>

The tool has been provided by <<mailto:gmaggiot@ciudad.com.ar>> Gabriel A. Maggiotti.
