The following security advisory is sent to the securiteam mailing list, and can be found at the SecuriTeam web site: <http://www.securiteam.com>

-- promotion

When was the last time you checked your server's security?

How about a monthly report?

<http://www.AutomatedScanning.com> -- Know that you're safe.

-----

Netware DHCP Server Contains a DoS Vulnerability

---

## SUMMARY

An attacker could cause the Netware server to reboot, simple by issuing a "non-standard" DHCP request.

## DETAILS

Vulnerable systems:

\* Netware version 6.0 with SP 1

The DHCP server suffers from multiple buffer overflows that can be triggered by sending oversized "non-standard" requests to the DHCP server.

## ADDITIONAL INFORMATION

The information has been provided by <<mailto:patrik@cqure.net>> Patrik Karlsson.
