The following security advisory is sent to the securiteam mailing list, and can be found at the SecuriTeam web site: <http://www.securiteam.com>

-- promotion

When was the last time you checked your server's security?

How about a monthly report?

<http://www.AutomatedScanning.com> -- Know that you're safe.

Bigeye, Service Emulation Tool

DETAILS

<<http://violating.us/projects/bigeye>> Bigeye is a network utility dump that can be run in multiple modes -- sniffer, logging connections, and even emulating protocols such as HTTP or FTP. The main idea behind this program is to create an emulative service that would fool hackers/worms into thinking that they are exploiting a real service, but in fact, they are trying to exploit a fake service. The services currently available are FTP or HTTP.

ADDITIONAL INFORMATION

The tool can be downloaded from:

<<http://violating.us/projects/bigeye/>>

<http://violating.us/projects/bigeye/>

The information has been provided by <<mailto:s3tuid@violating.us>> Victor Lima.
