The following security advisory is sent to the securiteam mailing list, and can be found at the SecuriTeam web site: <http://www.securiteam.com>

-- promotion

When was the last time you checked your server's security?

How about a monthly report?

<http://www.AutomatedScanning.com> -- Know that you're safe.

Tiny Honeypot

DETAILS

<<http://alpinista.dyndns.org/thp>> Tiny Honeypot (THP) is a simple honey pot program based on IPTables redirects, an xinetd listener, and perl. It listens on every TCP port not currently in use, logging all activity and providing some feedback to the attacker. The responders, written in Perl, provide just enough interaction to fool most automated attack tools, as well as quite a few humans, at least for a little while.

ADDITIONAL INFORMATION

The tool can be downloaded from:

<<http://alpinista.dyndns.org/thp/>> <http://alpinista.dyndns.org/thp/>

The information has been provided by <<mailto:gbakos@ists.dartmouth.edu>>

George Bakos.
