XRunAs, Remote Command Execution

---

## DETAILS

<<http://lazysysadmin.com/>> XRunAs is a tool that allows administrators to run commands on remote computers under the context of a specified user account without the use of the Schedule service. If XRunAs is used in conjunction with a domain account, commands that are run will be able to access network resources given that the domain account used to run the command has access to the network resource. All information that is transferred over the network while using XRunAs is encrypted using a standard encryption algorithm.

## ADDITIONAL INFORMATION

The information has been provided by

<<mailto:lazysysadmin@tranquilsuds.com>> LazySysadmin.
