PowerLink WAN Aggregator Multiple Vulnerabilities

SUMMARY

<<http://www.astrocorp.com/>> PowerLink WAN Aggregator is an Intelligent Link Load Balancing with Automatic WAN Fail-Over for 100% Always Available Internet Connectivity. An interesting way to increase Broadband bandwidth among several connections. Multiple vulnerabilities have been found in the product allowing attackers to gain elevated privileges, and access files that reside outside the bound HTML root directory.

DETAILS

Vulnerable systems:

- * PowerLink WAN Aggregator version 1.7.3.1
- * Boa web server version 0.92r

The below vulnerabilities occur because the product is based upon the Boa web server, which as we reported

<<http://www.securiteam.com/unixfocus/6G0081P0AI.html>> previously is vulnerable to attack.

Securiteam: [NEWS] PowerLink WAN Aggregator Multiple Vulnerabilities
