THC-Shagg, Serial Number Extrapolator, and Algorithm Analyzer

DETAILS

THC-Shagg is an application to brute force check digit algorithms. It analyzes a given list of serial numbers and tries to find a matching algorithm and its setup. If such a setup is found, THC-Shagg is able to generate (extrapolate) new serial numbers, e.g. VISA and MasterCard credit card numbers, EAN numbers, IMEI, UPC or even EFT routing numbers.

ADDITIONAL INFORMATION

The tool is available for download from:

<<http://www.thc.org/releases.php>> <http://www.thc.org/releases.php>.
