ByteHoard Directory Disclosure Vulnerability

SUMMARY

<<http://sourceforge.net/projects/bytehoard/>> ByteHoard is "an online file storage system, written in PHP. Includes automatic compression, multiple file views, fully-featured admin interface, global & user space limiters, authentication, ability to send files via email and more". A directory revealing vulnerability has been found in the product allowing remote attackers to reveal the content of directories that reside under HTTP root directory.

DETAILS

Vulnerable systems:

* ByteHoard version 0.71

By accessing the following URL: <http://victim.com/bytehoard/files.inc.php>,

it is possible to determine the content of directories residing under the HTTP root directory.
