Xxpoof – Spoofed Packet Generator for Windows

SUMMARY

DETAILS

Xxpoof is a little tool written in Pascal, which is designed to send spoofed packets with destination and source port of your choice. Just give the tool any destination address, where the spoofed packets will be send to. The user can also control the delay between the packets sent and the number of packets to send.

ADDITIONAL INFORMATION

The information has been provided by <<mailto:ah@primepage.de>> Alexander Hagenah.

The tool can be downloaded from:
