Yaotp, Yet Another One-Time Pad

SUMMARY

DETAILS

<<http://www.thc.org/>> Yaotp (Yet Another One-Time Pad) implements the one-time pad cipher for en- and decryption of messages. It features real random number generation by audio sampling and hashing, key management that enforces one-time usage and irreproducible key destruction. It is the right choice for the totally paranoid geek and high-security issues beyond any imagination.
