Vypress Tonecast Broadcast Shutdown (Crash)

SUMMARY

" <<http://www.vypress.com/products/tonecast/>> Vypress Tonecast is high-fidelity audio streaming software for local area networks. Vypress Tonecast allows you to easily setup and utilise your own radio broadcasting over an existing LAN infrastructure without the need for additional hardware or complex heaped software systems."

Vypress Tonecast consists of two modules: a server module that broadcasts the audio over the network and a client module which receives the audio. The client module does not handle malformed streams correctly and crashes immediately both in standalone mode and as a Winamp plugin.

DETAILS

Vulnerable Systems:

* Vypress Tonecast version 1.3 and prior

Upon receiving a malformed stream the client module of Vypress tonecast will crash. This behavior is common to both the client program and the Winamp plugin.

Securiteam: [NT] Vypress Tonecast Broadcast Shutdown (Crash)

A proof of concept example has been provided by Luigi and is available for download at <<http://aluigi.altervista.org/poc/toneboom.zip>>
