Cisco Clean Access Authentication Bypass

---

## SUMMARY

" <<http://www.cisco.com/en/US/products/ps6128/>> Cisco Clean Access is an easily deployed software solution that can automatically detect, isolate, and clean infected or vulnerable devices that attempt to access your network."

By Crafting special request, attackers can bypass Cisco Clean Access Agent's mandatory installation.

## DETAILS

Vulnerable Systems:

- \* Cisco Clean Access Agent version 3.5.4
- \* Cisco Clean Access Agent version 3.5.3.1

End users can bypass the "mandatory" installation of the Clean Access Agent by changing the User-Agent string of their browser. This allows them to connect to the network without the host-based checks being run. If configured, remote checks are still run.

## ADDITIONAL INFORMATION

Securiteam: [NT] Cisco Clean Access Authentication Bypass
