SmoothWall Express

---

## SUMMARY

## DETAILS

SmoothWall Express is an open source firewall distribution based on the GNU/Linux operating system. Linux is the ideal choice for security systems; it is well proven, secure, highly configurable and freely available as open source code. SmoothWall includes a hardened subset of the GNU/Linux operating system, so there is no separate OS to install. Designed for ease of use, SmoothWall is configured via a web-based GUI, and requires absolutely no knowledge of Linux to install or use.

## ADDITIONAL INFORMATION

The information has been provided by aslak.

To keep updated with the tool visit the project's homepage at:
