WebDrive DoS

---

## SUMMARY

" <<http://www.webdrive.com/products/webdrive/index.html>> WebDrive is more than just an FTP Client. By connecting to WebDAV, FTP, or SFTP servers through a virtual drive, files are transferred by simply saving them to a drive letter."

Improper length validation allows attackers to crash WebDrive.

## DETAILS

Vulnerable Systems:

\* WebDrive version 6.08 build 1131

The name entry field in WebDrive is prone to a buffer overflow vulnerability due to a programming error.  
The name field allows for 257 characters to be copied to a 256 character buffer.

Successful exploitation causes the program to fail, and crash on future runs of the program.

ADDITIONAL INFORMATION

The information has been provided by <<mailto:acastro@xxxxxxxxxxxxxxxxxxxxx>>  
Adrian Castro.
