SQLIBF – SQL Injection Bruteforcer

---

## SUMMARY

## DETAILS

SQLibf is a SQL Injection Brute–forcer tool for automatizing the work of detecting and exploiting SQL Injection vulnerabilities. This is not an easy or standalone application. It must be used by a web application auditor for helping and complementing his findings. SQLibf can work with both Visible and Blind SQL Injection vulnerabilities. It works by doing simple logic SQL operations to determine the level of exposure of the vulnerable application.

To download the tool: <<http://www.open-labs.org/sqlibf16beta2.tar.gz>>
