Mandriva Linux Security Advisory MDVSA-2008:076  
<http://www.mandriva.com/security/>

---

Package : wml  
Date : March 26, 2008  
Affected: 2007.1, 2008.0

---

## Problem Description:

Two vulnerabilities were found in the Website META Language (WML) package that allowed local users to overwrite arbitrary files via symlink attacks.

The updated packages have been patched to correct these issues.

---

---

To upgrade automatically use MandrivaUpdate or urpmi. The verification of md5 checksums and GPG signatures is performed automatically for you.

All packages are signed by Mandriva for security. You can obtain the GPG public key of the Mandriva Security Team by executing:

```
gpg --recv-keys --keyserver pgp.mit.edu 0x22458A98
```

You can view other update advisories for Mandriva Linux at:

<http://www.mandriva.com/security/advisories>

If you want to report vulnerabilities, please contact

security\_(at)\_mandriva.com
