The Web Application Firewall Evaluation Criteria project is proud to announce v1.0 of The Web Application Firewall Evaluation Criteria (WAFEC), its first official release.

WAFEC is a result of a collaboration between web application firewall vendors and independent security professionals to create a comprehensive, vendor-neutral, web application firewall evaluation criteria. The resulting framework can be used to evaluate and compare web application firewalls.

WAFEC v1.0 can be downloaded from the project home page:

<http://www.webappsec.org/projects/wafec/>

Participation in WAFEC is open to the interested parties. To comment on the work done so far or join the effort contact Ivan Ristic, the WAFEC project leader.

Regards,
