I've used the Phoenix Adaptive Firewall, both host install(just software) and their appliance. I really like the product.

Previously, progressive systems, aquired by cobalt, aquired by Sun.

It looks like they have re-branded the product as the Sun Cobalt Adaptive Firewall.

Subject: Question

Hello to all,

I know it's gotta be a stupid question but if anyone knows a good = FireWall product for Linux/FBSD Besides ipchains and so on,=20 something wich would work like Watchguard Box.

Thank You
