Thawte has a great FAQ section in regards to SSL certificates. In particular, you'll want to look at

<http://www.thawte.com/support/server/msiis5.html#move>, which addresses your specific situation.

Hope this helps.

Subject: How to migrate my VeriSign SSL certificate from IIS 4 to IIS 5

Hello All,

We've got a Verisign SSL certificate installed on our MS IIS 4 server. When we installed the certificate we first made a request on the IIS 4 server. Then send the request file to VeriSign. They sent me the certificate which we installed over our pending request on our IIS 4 server.

Now we installed a new server with IIS 5 on it. Our problem is: How do we install the current SSL certificate (from our IIS 4 server) on the new IIS 5 server without buying a brandnew certificate from VeriSign?

Kind regards,

Ronald Balk
