Salut,

On Thu, 2006-09-21 at 11:59 -0700, Keith Bucher wrote:

One option that I've used to log these commands is sudosh (<http://sourceforge.net/projects/sudosh/>). It acts as a login shell, but logs all commands/keystrokes and allows easy playback/review of them for auditing.

What if one of the commands is /bin/ksh? Or if the person in question runs sudo /bin/ksh?
