To all netcat gurus,

I hav been experimentin on netcat for a few days and searchin almost everyday on netcat for some possible uses ,but in vain.

As far as I know, no site is giving some other uses of netcat pertaining to pen-testing ...other than the usual *README* file which I find too basic.

I would be grateful if anybody could throw some light on uses of netcat in pen-testing.

Thanx in advance.

Cheers,
Kartik.
