i was looking for something else entirely and ran across this site which has something to say about compaq's web thingy, don't know if it might interest you or not, but here it is, <http://www.infosecuritymag.com/articles/june01/cover.shtml>
just take out the space after the www.

Subject: Compaq Vulnerability

Hello All,

This maybe really old but here goes anyway.

I am testing our local network and wanted to see how secure the Compaq insight management web thingy's are so I ran a capture of the admin logging in. I noticed it referenced a component /proxy/LoginResponse as part of the login process. So tacked it onto the end of the url and the service on the compaq box (cpmdi and CPQWMGT.exe respectively) died with an access violation.

Both

<http://targetip:2301/Proxy/LoginResponse>

And

<http://targetip:49400/Proxy/Loginresponse>

Produced the same result.

Is this old?

Kind Regards,
