Is anyone aware of any such tools which support Bluetooth?

Thanks,

Ozan

Subject: Wireless Security Tools

Hi

I've been trying to compile a list of wireless security tools, I think it's pretty much there with the exception of a few beta tools. Or so I think.....

If you know of any other good tools out there could you kindly let me know so that I can include them

thus far I have:

NetStumbler  
Kismet  
Fake AP  
Wellenreiter

RE: Wireless Security Tools

## SecurityFocus Penetration: RE: Wireless Security Tools

AirSnort  
WaveStumbler  
Wireless Scanner  
Airosniff (need new URL)  
AiroPeek  
Stumbverter  
AP Scanner  
Sniffer Wireless

salient details at <http://www.networkintrusion.co.uk/wireless.htm>

Fake AP sounds quite interesting

" Black Alchemy's Fake AP generates thousands of counterfeit 802.11b access points. Hide in plain sight amongst Fake AP's cacophony of beacon frames. As part of a honeypot or as an instrument of your site security plan, Fake AP confuses Wardrivers, NetStumblers, Script Kiddies, and other undesirables. "

Thanks in advance for any help

-andy
